WEBGRAB CONTENTGRABBER TOOL FOR TRANSLATORS

This simple solution helps translators to copy entire websites or just single pages with a few mouse clicks and save it as file. Subsequently, the file may be e.g. translated with any translation program and uploaded again.* This unique tool saves valuable time and costs.

Features and benefits of the automatic data leech for website content:

- Immediate use of the download function and payment via PayPal: <https://contentgrabber.cloud>
- Download function of the complete website of common CMS, e.g. Wordpress, Joomla as well as HTML
- Storage of the download, e.g. as a xml file
- Dashboard with all existing customer websites
- User rights management (individual access rights for employees)
- Upload function of the edited file, e.g. after translation work

Try the demo version now:

<https://content-grabber.test-ssc.eu>

Login: E-mail: demo@ppp.ms | Password: Demo_123

* For a re-upload certain CMS and a separate account are required.
